Architecture impregnated by nature and vegetation, we interpreted that our project should not only harmonize, but be inspired by the Mediterranean forest of southern Andalusia.

Our decision was to choose to fold them, joining them, giving them continuity, as happens with the leaves of plants. These giant leaves that have grown facing the sun, the west wind, harmonized with the relief, are the ones that give shelter to our homes.

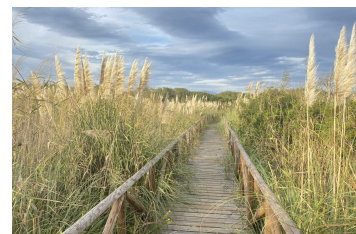

Sphere is made up of 33 impressive homes with two, three and four bedrooms with an interior layout that seeks to enhance the already enormous spaciousness of the spaces.

Homes designed under the constant premise of comfort and well-being.

Three facades and considerable floor-to-ceiling windows manage to ensure natural light in each of the homes.

The spacious living room, on two levels in the case of the duplex penthouses, is the heart of the home and, together with the terraces and gardens, manages to capture the natural environment and integrate it into its interior.

Generous and dual spaces, which provide both functionality and well-being. An oasis of privacy and sensory pleasure at the same time.
